

Bhog Sandesh | July 16, 2026 via Mohini Didi

Om shanti.

Taking remembrance of Baba, when I went to offer Bhog to Baba, Baba was giving very love-full drishti as if merging us into His Love. Very, very love-full.

Then after a few moments, when sharing of drishti was over, I said: Baba, we have brought Bhog for you. Baba accepted Bhog with a lot of love.

Baba said: Baba is the Ocean and the Bestower. The Ocean is unlimited, and He is also the Bestower. But some children don't know how to take from the Ocean. Even in the limited, physical world, if you have to fill something from a river or the ocean, it's easy. Baba as the Ocean is unlimited, but still, you need to know how to take from such an Unlimited Ocean.

For a few moments, there was quietness as I reflected on how to take from the Ocean.

Then Baba said: **Keep increasing your ability to take more and more.** You all are busy in giving, but Baba wants you to take. That is what these Avyakt Signals are about: whether the fire of love, the fire of remembrance...or the different forms of fire Baba has been mentioning. This deep receiving from Baba requires being very, very pure. Unlimited love with only the One. Unlimited love with Baba. And it is through this unlimited love that you are able to take from the Ocean.

So Baba looked at us. Of course we all have unlimited love for Baba: love for Baba, love towards all souls, love for the elements/nature, and love for Baba's Task. In Baba's Task, whatever you have to do...do it with love.

Baba said: **this power of love in us will increase the power in the thought.** Very soon the time will come –when most of your seva will be through the power of thought. **To get each thought accomplished, you have to have this pure power of love** so that every thought for whomsoever or whatever ... it will reach and get accomplished. Baba has been saying to do more *mansa seva* so that your ability to serve through the thought increases. The time might come when you won't have any facilities to communicate or do anything – but your thoughts will get it accomplished. *Siddhi Swaroop*. Every thought will do what it has to do. There will be success.

So, increase the power of thought, and that will increase the ability of thought to reach where it is needed. Baba wants to draw attention of the children to increase the power of love, the power of purity, the power of remembrance in your thoughts. You will see how, whether getting a signal from Baba of the time, or a signal from nature, or even a signal from each other, you will be able to catch those signals and work in that direction. Baba took us very deep. Time is changing, and will change more very soon.

Baba then said: one is what the elements will do. But also, the intellect of the people – they might think that what they are doing will lead to peace...but instead it will be more and more destructive. Why are the elements so upset? Because the elements are being destroyed also. A lot of natural resources are being destroyed. So it's not only violence towards people, but also violence against the nature that sustains everyone: air, water, food...what will we do without these? Nature provides, so there has to be respect for nature.

Do not waste time or thoughts. Whatever your service duties are as a *karma yoga*...pay attention to increasing the power of the mind so you are successful at tasks and they get easily accomplished without any obstacles.

It seemed like Baba was giving us a signal. And then Baba gave love-remembrance to everyone.

Om Shanti
