

Taking everyone's love and remembrance, when Baba called me to the subtle region, with Baba was Dadi Janki too, both of them were standing together. And Baba welcomed me. Baba invoked all of us and also welcomed us to the subtle region. After a few moments, when Baba met us with a very loving and powerful drishti, the rays of love and power that were in Baba's eyes were reaching the whole gathering, they were reaching all of Baba's children in the entire world. When Baba gave me drishti, for a few moments it was as if I was experiencing a lot of light and might within myself.

Then I told Baba: Today I have brought bhog for You, for Dadi Janki and all of Dadi Janki's companions. Baba accepted bhog with great love. After that, Baba said that children always think about, invoke and *emerge* the Dadis. They remember Baba and each of the Dadis with great love and invoke them. I saw this scene.

Baba asked Dadi Janki: Dadi, everyone is remembering you a lot. So Dadi smiled and said: I am also remembering them a lot. After a few moments Dadi said: All of you are invoking us and we are invoking you. You think that Dadi should become *present* here and Dadi says that all of you should become *present* up above. Then Dadi said: Look, you become our companions. So I was watching when Dadi was saying this. Then Dadi said that to become our companions, it is not necessary that you have to leave your bodies and come to the subtle region, but to become our companions in your thoughts, words and actions...

Baba then added: From the beginning, no matter how Dadi Janki's health was, she had a lot of practice in serving through the mind. She was always serving the world with her mind. So, if all of you also want to support us Dadis, then increase your service through the mind. By serving through your mind, you will become angels, that is, you will become detached from your bodies, in a bodiless state, you will become completely angelic. While serving through your mind, your form will become angelic. And then, along with serving through the mind, your words and your speaking will give many kinds of good experiences; they will experience *silence*, they will experience detachment, they will have many kinds of good experiences.

Then, when you are doing karma yoga, in the way that all servers are very busy with karma yoga, then the impact of your thoughts, words, and actions will also be great. Baba said: The more you become angelic, the more tireless you will be. Otherwise, nowadays, there is a lot of service and there is a lot of expansion. Baba said: The angelic stage, being loving and detached and lightness, will make you tireless. No matter how much you do, you will still remain *fresh* and light and will feel like doing more. So, firstly, you have to have this thought and then you do it. Secondly, you also need the capability and a lot more power. Baba then said: Everything in the world is unlimited. There are so many souls in the world, so you have to be tireless servers and unlimited servers. In order to do that service, the angelic stage is very essential. And today, Baba has especially said: While serving with your mind, you will become angels.

So for a few moments, Baba, along with Dadi and the other Dadis were having a heart-to-heart conversation with us about what the present stage of the children should be. Always remain beyond all limits, stay in the unlimited, and let there be generosity in your heart. Have a very unlimited heart, a big heart and have an unlimited intellect. May your heart always be that of a bestower. Baba said: Both of these qualities are very essential at present.

Then Baba said: Just as Dadi Janki was an embodiment of power, equally she had a lot of compassion in her heart. If anyone had any small sanskar or weakness, Dadi's attention never went to their sanskar, but towards their specialities. Baba was saying: Dadi always saw the speciality of each one and, while giving drishti, that person would himself become aware of his speciality, he would feel that he was a special soul, and that he has a special part. So Baba said: When this is experienced, the entire family will become one of special souls, of great souls only.

So today Baba was telling all of us: Come, come to the subtle region with us and do service there. At first, I wondered, how will we serve in the subtle region? Then, as Baba was having a spiritual conversation, He said: Children, a time will soon come when two things will happen. First, the achievements, *facilities*, and resources will gradually diminish. Both through human intervention and natural disasters. Because human

nature, nature itself, is increasingly filled with jealousy, hatred, vengeance and ego. All of this is increasing. So, the resources and facilities you receive from nature, which sustain your body, will also *diminish*. This is what is called diminishing gradually, gradually, not drastically. Because destruction will not happen like this - not like a war, but in another way, as Baba has said many times before in the murli. You will not receive anything. You will have diamonds in your hands, you will not have food. Baba said: People of today are creating such situations by themselves through their stage. But Baba told you children to remain fearless, not to worry, there is nothing to worry about. Not only will your needs be met, but you will also continue to receive more facilities for service. You will receive more and more programs, where everyone will want you to give a message, to speak about world peace. So, there is still a lot of service to be done through your form and your face. Of course, service is expanding, but there is still a lot of service to be done.

And for that service, Baba said: Your true nature, peace, love, whatever virtues you have, should be visible in your form. The more this is reflected in your true nature, the more souls will receive from that nature, and through your form, their *connection* with Baba will also be forged. So, Baba said: Some you have to do a new kind of service. Firstly, you make your own plans, but according to the time, with that stage – call it the angelic state, the loving and detached stage – with your form of peace, love and power, maximum service will be done.

Devotees are calling out to all the gods and goddesses, all those who are worthy of worship, to have a vision of them. So, you must now keep your practical form, your divine form, visible and grant the devotees a vision, so that those souls who are searching are able to find their path. Thus, Baba explained what we all need to do at this time.

Then Baba said: Keep the example of Dadi Janki in front of you. And what is that example? She performed all three services equally - through thoughts, words, and actions. So, all of you must also continue with all three types of service, through your thoughts, words, and actions, all at the same time."

Baba was talking to us children and, as He was talking, it was as if the complete form of us children was emerging from Baba's drishti. Baba said: Now, from your drishti too, everyone should experience their own complete and perfect form. Not looking at anyone's sanskaars, or weaknesses, through your drishti, let each one feel that that is their perfect form. Just as you all experience this through Baba's drishti, let everyone experience it through your drishti.

I said: Baba, Sister Jayanti and Sister Hansa have sent lots of love and remembrance. Baba and Dadi said to both of them: Children, as much as you all are remembering, Dadi too remembers you a lot, since you were companions. You both are playing your parts very well, and keep playing your parts like this.

Baba said specifically to Sister Hansa: Child, there will be a lot of service; do not have any other thoughts. Continue to become an embodiment. Continue to serve everyone through your drishti. This is your part too. Dadi then took Sister Jayanti's hand and gave them both her love and remembrance.

Then both Baba and Dadi gave lots of love and remembrance to all of us, and gave blessings through their hands. Baba showed His hand of blessing with every kind of attainment and, saying this, and bringing Baba's remembrance through drishti, I came back here. Om Shanti.
